- EC2, volumes and snapshot
- Identity Access Management, Cloud Watch, Route53
- RDS using Security Groups
- Building Custom VPC, NAT and Access Control Lists

COURSERA | R Programming
December 2014 – Present Certificate Link
Completed R Programming with distinction -

COURSERA | Mining Massive Datasets
December 2014 – Present Certificate Link
Earned Statement of Accomplishment, grade achived 59.2 %

EDX | Introduction to Computer Programming
September 2014 - Present Certificate Link
Successfully completed the CS101.1x, courses offered by IITBombay

PROJECTS

SHIRINKING MYSQL DATABASE
Major drawback with the default big MySQL system tablespace, reclaiming of unused space after deletion of table is not possible.
- Analysis of best approach
- Alter table vs database dump
- Recreating table spaces and indexes as individual files
- Extract existing tables from ibdata1 , dropping old database and importing it again to reclaim the unused size

MYSQL DATABASE MIGRATION WITH ZERO DOWNTIME
The need for database migration was due to adding a new column to a large table, moving to better hardware or increasing the storage on the hardware
